Subject: Questions regarding Treasure Island

Andre,

Thank you for your phone call asking about Treasure Island. For over 20 years, the Navy has been conducting investigation and cleanup of hazardous waste and other toxic contamination at the former Treasure Island Naval Station. They are doing this work under the oversight of the State of California following the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), commonly known as "Superfund." In that sense, it is a "Superfund Site, however, Treasure Island is not listed on the National Priorities List (NPL), which is often also used to identify a site as a "Superfund Site."

Below is the EPA ID number for the Site, and the link to the website showing the status.

EPA ID	Site Name	City	County	ST	NPL Status
CA7170023330	TREASURE ISLAND NAVAL STATION	SAN FRANCISCO	SAN FRANCISCO	CA	Not NPL

<https://cumulis.epa.gov/supercpad/Cursites/csitinfo.cfm?id=0902776&msspp=>

You may be interested in one of the more recent cleanup activities on-going at the Gateview Avenue Neighborhood, this is listed on the Navy's website for the Treasure Island cleanup:

https://www.bracpmo.navy.mil/brac_bases/california/former_ns_treasure_island/treasure_island_residents_tenants.html

For more information about the contamination and cleanup at Treasure Island, please contact the Navy and State of California Department of Toxic Substances Control (DTSC) representatives:

Keith Forman, Navy
 BRAC Environmental Coordinator
